Profile

A Data Science postgraduate with 1 year of hands-on experience in Python, and a strong foundation in data analysis, machine learning and data visualization. Demonstrated the ability to extract actionable insights from complex datasets and delivered findings in a clear and concise manner. Keen about leveraging data to drive business decisions and operational efficiency. Aspiring to continually learn, grow and make meaningful contributions in the field of Data Science.

Skills

- **Programming Languages**: Python, C/C++
- **Data Analysis and Machine Learning:** Pandas, NumPy, Scikit-learn, Tensorflow, NLP, Statistical Analysis
- **Visualization and BI Tools:** Matplotlib, Seaborn, Power BI, MS Excel
- **Machine Learning:** Scikit-learn, Keras, TensorFlow/PyTorch
- **Big Data and Databases**: SQL, PostgreSQL, Hadoop, Spark
- **Backend and cloud Technologies**: Django, Celery, AWS(S3), REST APIs
- **Development and Tools:** Git, GitHub, Visual Studio Code, Google Colab
- **Agile and Collaboration Tools:** JIRA, Confluence

Experience

Sumprio Technologies Private Limited (May 2025- Present)

- Designed and optimized backend APIs for a Django-based CRM application, improving data flow efficiency and system reliability.
- Conducted performance and stress testing using Apache JMeter, identified bottlenecks, and improved server response time by 25%.
- Implemented structured unit testing for the entire application and maintained technical documentation in Confluence while managing tasks through JIRA, ensuring code quality and organized development workflows.

Zaalima Development (Internship) (April 2025- July 2025)

- Developed a Fraud Detection System leveraging machine learning models (Random Forest, XGBoost) to achieve 95% accuracy in identifying fraudulent transactions.
- Built an AI-powered Resume Screening System with spaCy, TF-IDF, and BERT integration, improving recruitment efficiency by automating resume-job description matching with a 92% accuracy rate.

Outlier (Freelance) (Feb 2025- April 2025)

- Reviewed 30+ AI-generated code samples and contributed 50+ high-quality responses and code solutions for Supervised Fine-Tuning (SFT), improving model accuracy, code quality, and adherence to best practices.

California Institute of Genetics (Internship) (Nov 2024- Jan 2025)

- Contributed to research and collaborated with a multidisciplinary team to design and implement machine learning model aimed at identifying biomarkers of Parkinson's disease to develop an AI-driven approach for early Parkinson's disease diagnosis.
- Achieved 92.4% accuracy for the hybrid machine learning model in pre-Research and Development (R&D) phase.

Education

Master of Technology
Computer Science (Big Data Analytics)
Vellore Institute of Technology, Chennai, Tamil Nadu
CGPA: 9.42

Bachelor of Engineering
Electronics and Telecommunication
Army Institute of Technology, Pune, Maharashtra
CGPA: 8.96

Projects

Smart Outreach Tool: An AI-Powered Cold Email Generator. (Oct 2024- Nov 2024)

- Developed an AI-driven platform with A/B testing to automate and personalize cold emails, enhancing outreach relevance and engagement for professional communication.
- Setup: Python, ChromaDB, Streamlit, Llama, Pandas, NumPy, Scikit-learn.

Publications

- "Robust Seizure Prediction Model Using EEG Signal for Temporal Lobe Epilepsy Leveraging Deep Learning and Continual Learning", IEEE Access, Volume 13, August 2025. DOI: https://ieeexplore.ieee.org/document/11112557.
- "Decoding Market Dynamics: Variational Quantum Circuit in Stock Prediction", Advances in Quantum Inspired Artificial Intelligence, Springer, Volume 274, June 2025. DOI: https://link.springer.com/chapter/10.1007/978-3-031-89905-8_2.
- "A deep learning framework for prediction of cardiopulmonary arrest", EAI transaction on Pervasive Health and Technology, Volume 10, March 2024. DOI: 10.4108/eetpht.10.5420.

Certifications

- Data Science Bootcamp from Udemy.
- Python in Data Science from Cognitive Class, IBM.
- Data Analytics Essentials from CISCO Networking Academy.

Achievements

- AICTE-PG scholarship for academic year 2022- 2024. Offered to GATE qualified and student opting for higher studies after Under graduation from AICTE approved institutes.
- Second rank in academics in first year of M. Tech 2022-2023 in VIT, Chennai.
- Central Sector Scholarship from MHRD Government of India (2015-2019). Offered to students undergoing Under graduation and had performed well in senior-secondary.
